

# soken

One-stop service provider in tailored  
cyber security solutions

Soken is your all-in-one partner, offering a suite of services to deliver legal and security solutions tailored to your project's unique needs.

**Below, we will provide a list of the complete set of legal documents necessary for a project to:**

- ✓ Be maximally protected from all angles in relation to all parties involved
- ✓ Be perceived as thoroughly thought-out and well-prepared in the eyes of investors, venture capitalists, exchanges, aggregators and users
- ✓ Be ready for safe and successful scaling or expansion into new jurisdictions and geographical areas

The document preparation stage and the meticulousness of this process often reveal the professionalism of the team's approach and directly associate with the foresight of the project founders' intentions. So get presented in the best possible shape in the minds of your partners and users.

**Soken is about partnership with creating new horizons for your business.**

Market Making

AML / KYC

Listing on CMC

Successful launch  
with VC + MM

Integrated Legal support

Re-audit

Highly competitive  
Web3 project

# TYPES OF ESSENTIAL LEGAL DOCUMENTS

## SAFT Agreement:

Regulating the private sale of future tokens to strategic investors, this document offers preferential terms, discounts, and clarity in the token sale process.

## Website Terms & Conditions:

This fundamental document governs the legal interaction between your website and its visitors/users, ensuring full legal protection for the owner. It covers copyright protection, intellectual property, user behavior, rights, third-party links, and services.

## ICO Terms & Conditions:

Regulating the public pre-sale of tokens conducted on your website, this essential document ensures a transparent and legally sound token sale process.

## Privacy Policy GDPR and CCPA:

A compulsory document that meticulously regulates the security procedures for personal data, aligning with GDPR, CCPA, and other relevant regulations.

## Risk Policy:

This essential document is your legal shield against inexperienced, uninformed, or ill-intentioned investors or platform users.

## Vesting Agreement:

This document ensures the strategic blocking of vested tokens, showcasing your project's commitment and legitimacy to investors.

## AML/KYC Procedure:

Essential for future regulatory compliance, this document regulates your adherence to know your client and anti-moneylaundering obligations, enhancing the credibility and safety of your business.

## NDA/NCA Agreements:

Regulating confidentiality and non-competition obligations, these agreements protect your company's interests when individuals, such as developers, advisors, or promoters, gain access to confidential information.
